

YOUR RUNNING SHOE MATCH REPORT

Generated April 25, 2026

Based on your overpronation pattern, flat foot type and 30 km weekly volume on trail terrain, you need a stability-oriented daily trainer with moderate cushioning, a low-to-mid drop and a durable outsole rated for mixed surfaces. Your 10K race goal benefits from responsive foam compounds.

YOUR BEST MATCH

Adidas Adizero Boston 12

\$145

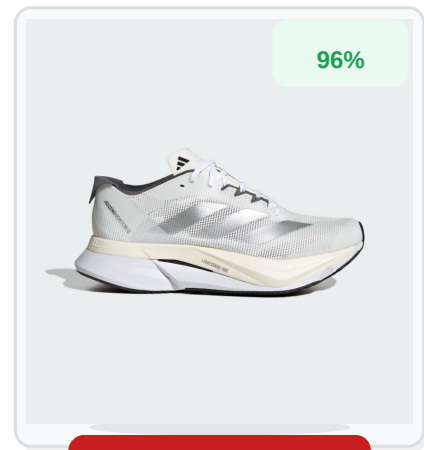

268g | 8mm drop | Cushion: 8/10

- Energetic PEBA midsole foam returns 78% of impact energy on toe-off
- Engineered mesh upper locks the midfoot without hot spots on long runs
- Carbon-rubber outsole rated for 800+ km of mixed-terrain training

WHY IT MATCHES YOU

- Stability platform aligns with your overpronation profile
- Boost cushioning matches your 30 km/week training volume

WHY THIS MATCH WORKS

This rotation balances support and energy return for a flat-footed overpronator targeting 10K performance on trail. The daily trainer prevents inward roll while the speed shoe sharpens turnover for race-day. The long-run option absorbs repetitive impact across longer mileage.
